Arnold Jin

FULL-STACK / E-Commerce DEVELOPER

Gmail: arnoldjin0712@gmail.com, Telegram: @greenland712, Skype: live:.cid.9e2f3680ddbc5cb5

Skilled and motivated full-stack developer with 6+ years of experience.

Created 40+ websites using several programming languages and frameworks. Advanced in many languages and frameworks such as JavaScript/Typescript, React/Next/Vue, and Ruby on Rails.

Built 10+ E-Commerce websites using Shopify, Magento, and Headless CMS (Strapi, Contentful).

Own the development of product features end-to-end including scoping, architecting, coding, testing, and rolling out features.

EXPERIENCE

Aug 2022 – Present
Full-stack Developer, Self-Employed

• Improved eCommerce web app performance by +18% using ImageEngine for React and reduced response time from 8.21s to fewer 3s and made real-time chats secure using SSL by NextJS

• Created a Map Tracking System and data analysis charts and diagrams for Uber-like platform using React, TailwindCSS, react-leaflet, chart.js and D3.js.

• Developed highly interactive web applications while integrating Restful APIs and external web services, ensuring high performance.

• Built 4 customized node.js modules integrated with social APIs and deployed projects by AWS EC2, CloudFormation, and Jenkins

Aug 2019 – Aug 2022
Full-stack Developer, C&F

• Implemented features for the main site and internal applications using React/Redux, NextJS, NodeJS with GraphQL.

• Improved and upgraded the development tooling and workflow for several projects (Ruby on Rails).

• Integrated platforms with various cloud services and third-party APIs, including Amazon S3, AWS EC2, AWS Lambda, PayPal and Mongo Cluster.

• Built E-Commerce website using NextJS and Strapi and deployed it by DigitalOcean.
• Built Swagger API to help users build, document, test, and consume RESTful web services
• Established reusable & responsive React chart components using D3.js that support interactive visualizations of data and analysis.
• Used Elastic search engine on AWS to speed up web page performance and React Hooks to prevent unnecessary re-renders.

Nov 2016 – July 2019

Front-end Developer, ANGI

• Supported the hosting and management of a client base of 300+ websites.
• Created a web app MVP for a store delivery management platform with 200+ business customers to create, manage, and monitor deliveries using React and Redux.
• Added features to meditation app with 5,000+ monthly users, enabling audio and video uploads using Amazon S3 bucket.
• Introduced new media to the company's production team.

EDUCATION

Warsaw University of Technology, Poland

Bachelor's Degree in Computer Science 2012 - 2016

SKILLS

Languages
• Ruby
• JavaScript/TypeScript
• Python
• HTML5, CSS3, Bootstrap5

Frameworks & Libraries
• Ruby on Rails
• Node.js
• React/Redux
• Vue.js
• Next.js, Nuxt.js

- Django/Flask

Database
- MySQL, PostgreSQL, SQLite
- MongoDB, Oracle, Amazon DynamoDB
- Firebase

AWS & E-Commerce Tools & CMS
- AWS Lamda, AWS S3, AWS EC2
- Shopify, Magento, Strapi
- Salesforce, SFCC, SFSC, Salesforce CRM, API2Cart

Paradigms & Tools
- Scrum, Agile
- CI/CD
- SOLID, DRY, KISS
- Unit Testing, TDD
- Jira/BitBucket, Github, ClickUp
- Postman
